

Precision turned parts from samples to mass production

„Well-known companies
from different industries
place their trust in us.”

Andrea Schneider
Management, Commercial Department

Defining and reaching goals

Are you looking for a reliable and capable manufacturer for your turned parts? Then you have found the perfect partner in us. We deliver the highest measure of precision in a broad range of applications. As a family-managed business with more than 40 employees, flexibility is one of our great strengths. We respond quickly to specific situations and offer target-oriented solutions.

Sensor technology | Electrical Engineering | Mechanical Engineering | Automotive Industry

„Our highly qualified employees
are committed to absolute
customer satisfaction.”

Thomas Hörr
Management, Technical Department

Shorter setup times – maximum profitability

100 percent CNC – that means highest and most profitable precision in the processing of the raw material. We continuously invest in state-of-the-art CNC production lines and offer the highest degree of flexibility due to the great number of identically designed machines. From prototype and average quantities to mass production – we meet the growing technical requirements on complex, ready-to-mount precision turned parts.

CNC lathes

Passage from \varnothing 3-51 mm
Turning length up to 700 mm
Tolerances: > 0,01 mm

Materials

Stainless steels up to V4A
Case-hardened steels and heat-treated steels
Machining steel

**STATE-OF-THE-ART
MECHANICAL ENGINEERING
AND SYSTEMS ENGINEERING**

**TECHNOLOGY
100% CNC**

**CORE COMPETENCE
STAINLESS STEEL**

„Hörr is synonymous with top quality and delivery reliability. Our end-to-end documentation offers you the necessary safety.”

David Tobert
Manager Quality Department

High-precision turned parts in series with ever smaller tolerances

Quality is an integral part of our corporate philosophy. This begins in the stage of the customer request and continues throughout the entire manufacturing process up to delivery. By detailed preliminary planning, we gather all required parameters such as the required tools, technical equipment, measuring instruments or capacities. Our measuring instruments and inspection technologies consistently guarantee best results.

Certified

DIN ISO 9001:2015
DIN ISO 14001:2015

Post-processing

Galvanic and thermal post-processing
Vibratory grinding, polishing
In addition, we offer you state-of-the-art cleaning technology and residual dirt analysis

WE PRODUCE AND DELIVER
RELIABLE QUALITY

We look forward
to working with you.
